

SmartHire Troubleshooting Guide

Before You Begin

To ensure a smooth assessment experience, please make sure that you:

- Have a stable internet connection.
- Use a supported Windows or Mac device.
- Have administrator access to your system.
- Close all unnecessary applications before launching SmartHire.
- Download and use the latest version of the SmartHire application.

If you continue to face issues after following the troubleshooting steps below, please contact the support team with a screen recording, screenshot, and your system specifications.

1. Internet Connectivity Issues

A stable internet connection is required throughout the assessment. If your assessment is interrupted due to internet issues, recovery may not always be possible.

What you can do:

- Switch to a different network.
- Use a mobile hotspot if available.
- Check your internet speed on Fast.com before starting the assessment.

2. Unique Code Issues

Incorrect or Expired Unique Code

The SmartHire unique code is valid for a single session only. If you close or exit the SmartHire application, you must generate a new code.

Steps:

1. Log in to your Unstop account.
2. Open the opportunity page.
3. Click on the assessment round.
4. Copy the newly generated unique code.

If the issue persists:

- Whitelist SmartHire in your antivirus software.
- Temporarily disable antivirus software and Windows Defender.
- Reinstall the SmartHire application.

3. Unable to Download SmartHire

The SmartHire application becomes available only after the assessment round starts.

Steps:

1. Open the opportunity page.
2. Click the **Start** button beside the assessment round.
3. Download the application for your operating system (Windows or Mac).

4. Window Management Issues

If SmartHire is unable to manage application windows:

1. Disable all app permissions.
2. Reload the application.
3. Enable permissions again.
4. Ensure you are using the latest SmartHire version.
5. Restart your system and try again.

5. Screen Sharing Issues

Screen sharing permission is mandatory for all SmartHire assessments.

For Windows Users

- Ensure you have administrator access.
- Whitelist SmartHire in your antivirus software.
- Test screen sharing through Zoom or Google Meet.

For Mac Users

1. Open **System Settings > Privacy & Security > Screen Recording**.
2. Enable permission for SmartHire.
3. Restart the application.

If the issue continues, try using another system with administrator access

6. Application Version Issues

Always use the latest version of SmartHire.

Steps:

1. Download and install the latest version.
2. Restart your system.
3. Click **Close All** within the application.
4. Remove any applications that continue to appear in the list.

7. Unsupported Processors

SmartHire currently does not support certain processors such as:

- Athlon
- Celeron
- Pentium

If you are using one of these processors, please share your system specifications with the support team.

8. Background Applications Detected

Some applications running in the background may interfere with SmartHire.

Steps:

1. Open Task Manager.
2. Locate the application.
3. Click **End Task**.
4. Restart SmartHire.

If required, uninstall the application through the Control Panel.

9. Next Button Not Working

If the assessment becomes unresponsive:

1. Press **Windows + D**.
2. Open Task Manager.
3. Close all problematic applications.
4. Reopen SmartHire.
5. Refresh using **Ctrl + R**.

10. Multiple Monitor or Extended Screen Detection

Windows Users

1. Open Device Manager.
2. Expand the **Monitors** section.
3. Remove any unused monitor entries.

Mac Users

- Restart your device without connecting the charger.
- Ensure no HDMI devices are connected.

11. Webcam Issues

If your webcam is not working:

- Ensure you have administrator access.
- Check antivirus restrictions.
- Verify that camera permissions are enabled.
- Ensure no other application is using the camera.
- Open any physical webcam shutter or privacy cover.

External webcam users can test their webcam before attempting the assessment.

12. "Something Went Wrong" Error

This error is usually caused by network or DNS-related issues.

Try the following:

- Switch to another internet connection.
- Restart your router.
- Update your DNS settings.
- Restart SmartHire.

13. Excessive Verification Attempts

If verification keeps repeating:

1. Ensure you are logged into your own account.
2. Log out and log in again.
3. Use OTP Login or Continue with Google.
4. Retry the verification process.

14. Audio Verification Issues

If your microphone is not being detected:

1. Open your system sound settings.
2. Verify that the correct microphone is selected.
3. Test the microphone.
4. Try another microphone if available.

15. Information Required by Support

If the issue remains unresolved, please share the following details with the support team:

- Operating System
- RAM, Processor, and Storage Details
- Screenshot or Screen Recording of the Issue
- List of Running Background Applications
- Fast.com Internet Speed Test Screenshot

Providing these details will help us investigate and resolve the issue more efficiently.
